

Quality and Environmental Policy

Enatel is committed to exceeding customer expectations with reliable quality and sustainable products and services.

Our business strategies and objectives align with company Vision and Values. Directors, Management and Staff are responsible to monitor risk and ensure the business follow our system, relevant standards, and complies with relevant legal requirements.

Enatel works in collaboration with Product Designers, Suppliers, and Manufacturers driving initiatives to protect the environment, reduce waste, minimise the consumption of resources and prevent pollution.

We review our Quality and Environmental Management System, its performance and controls relevant to significant environmental aspects and associated impacts, driving opportunities for continual improvement.

Enatel employees are trained to be aware of their responsibilities to the environment and issues related to daily operations. Enatel involves employee in initiatives to achieve Quality and Environmental objectives.

We have developed and maintained an effective Quality and Environmental Management System compliant to ISO9001, ISO14001, relevant product design standards, Regulations and Directives, and Factory Certification requirements.
